New development updates in this edition of the tracker

Costa Rica has been added to this edition along with amendments to Ireland.

Legend

- The term “Legislative status” refers to each transaction type – business-to-government, business-to-business and business-to-consumer – and indicates whether the jurisdiction has received approval for legislation from the relevant legislative bodies. If legislation is approved, it either mandates e-invoicing, allows voluntary use, prohibits e-invoicing or indicates that there is no official announcement:
 - “Mandatory” is used to indicate when legislation on e-invoicing already has been enacted and is compulsory.
 - “Allowed but not mandatory” indicates that e-invoicing rules have been enacted but on a voluntary basis.
 - “Not allowed” indicates that e-invoicing cannot be used for a specific transaction type.
 - “Not applicable” indicates that no announcement has been made on e-invoicing.
- “Horizon scanning” reflects future e-invoicing developments. It includes cases where legislation has been approved by the relevant bodies and where announcements to implement e-invoicing have been made, but the legislation awaits a procedural formality for formal enactment.
